

DIABETIC RETINOPATHY INDIA INITIATIVE

A five year programme aimed at developing and integrating services for detection and treatment of diabetic retinopathy

69 million people in India live with diabetes.

1 in 5 people with diabetes in India suffer from diabetic retinopathy.

GOAL OF THE PROGRAMME

To reduce avoidable blindness due to diabetic retinopathy by improved control of diabetes, early detection and treatment of sight threatening retinopathy with high quality, affordable treatment, and increased awareness in the population.

APPROACH

To establish models of sustainable and scalable services for the detection and treatment of diabetic retinopathy, which are integrated into the Government of India's health system at every level.

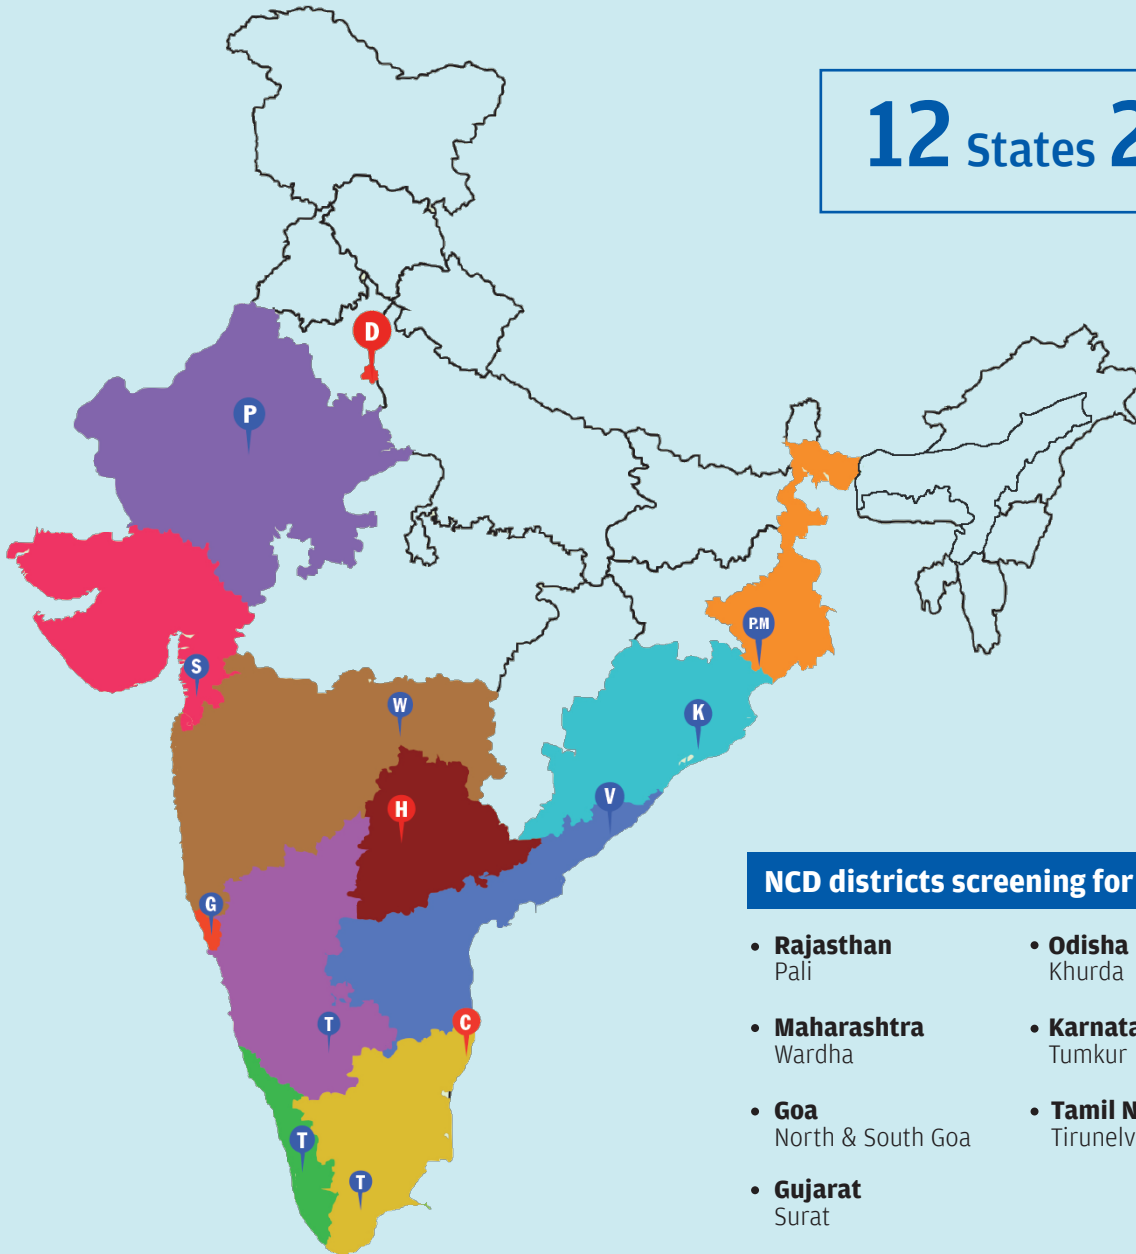

Programme Areas

- 1 Advocacy and communication
- 2 Improving capacity of physicians, dieticians and counsellors to improve control of diabetes
- 3 Improve the capacity of people with diabetes to improve the control of the condition
- 4 Implement and evaluate integrated district models for the control of diabetic retinopathy that strengthen health systems
- 5 Increase awareness of professionals, by publishing and disseminating the findings of the situation analysis
- 6 Build capacity in operational, implementation and health economics research
- 7 Monitoring and evaluation
- 8 Website for dissemination to different audiences

Supported by the Queen Elizabeth Diamond Jubilee Trust
